pecially of the air force depot at Velten continued to decrease in July. Although the monthly average of incoming and outgoing shipsenfor in the first six month of 1954 amounted to 137 and 157 carleads the depos of the Twenty-Fourth Air Army $_v[$ 25X1 25X1 carloads in July. The volume of supply traffic of the GSFG depot, in July is 30 carloads below the monthly average of the first 25X1 six month in 1954. The earlier ausumption that the considerable decrease in supply traffic is due to the fact that the containers are being cleaned is no longer plausible. It is bolieved that the depots are filled to depacity and that numerous small shipments 25X1 are consigned directly to the consumers. is reported for the 25X1 first time.
